Poverty and Welfare in Habsburg Spain

Mexican Karismata chronicles the life of Francisca de los ?ngeles (1674?1744), the daughter of a poor Creole mother and mestizo father who became a renowned holy woman in her native city of Querätaro, Mexico, during the high Baroque period. As a precocious young visionary and later as the headmistress of an important religious institution for women, Francisca actively partook in the project to revitalize the Catholic cult in New Spain’s northern regions led by her mentors, the Spanish missionaries of the Congregation for the Propagation of Faith. Her copious correspondence,
containing hundreds of unedited letters, documents the personal experience of popular Catholicism during the high Baroque period in New Spain. Francisca’s journey to God did not follow prescribed hagiographical guidelines, drawing its inspiration instead from an eclectic mix of the doctrines of the Counter-Reformation, medieval spirituality, and local traditions. Her ecstatic apostolate to the dead and living often bordered on heresy but found acceptance and came to fruition under the protection of Querétaro’s ecclesiastical and secular elite. Her life shows how mystic rapture and sociability joined in this colonial variation of Early Modern Catholicism and demonstrates the remarkable vitality and openness of urban spirituality in the New World.

Widowhood in Early Modern Spain

This is the first book in English to analyse the medical category of ‘hermaphroditism’ in Spain over the period 1850-1960. It attempts to show how the relationship between the male and female body, biological ‘sex’, gender and sexuality constantly changed in the light of emerging medical, legal and social influences. Tracing the evolution of the hermaphrodite from its association with the ‘marvellous’ to the association with intersexuality and transexuality, this book emphasizes how the frameworks employed by scientists and doctors reflected not only changing international paradigms with respect to ‘hermaphrodite science’ but also social anxieties about shifting gender roles, the evolving discourse on sexuality and, in particular, the increased visibility of the ‘sexual deviancies’ such as homosexuality and changing legislation on marriage and divorce. Finally, we hope to open a space whereby the voice of ‘hermaphrodites’ and ‘intersexuals’ themselves could be heard in the past as agents in the construction of their own destiny as figures deemed ‘in-between’ by medicine and society.

Cumulated Index Medicus

First multi-year cumulation covers six years: 1965-70.

Hermaphroditism, Medical Science and Sexual Identity in Spain, 18501960

A renewed case for the inclusion of Spain within broader European Renaissance movements. This interdisciplinary volume offers a snapshot of the best new work being done in this area.

Elihu Root Collection of United States Documents Relating to the Philippine Islands

This is a history of the Enlightenment—the rights-oriented, formalist, secularizing, freedom-inspired eighteenth-century movement that defined modern Western law. But rather than members of a cosmopolitan Republic of Letters, its principal protagonists are non-literate, poor, and enslaved litigants who sued their superiors in the royal courts of Spain's American colonies. Despite growing evidence of the Hispanic world's contributions to Enlightenment science, the writing of history, and statecraft, the region is conventionally believed to have taken an alternate route to modernity. This book grapples with the contradiction between this legacy and eighteenth-century Spanish Americans' active production of concepts fundamental to modern law. The Enlightenment on Trial offers readers new insight into how Spanish imperial subjects created legal documents, fresh interpretations of the intellectual transformations and legal reform policies of the period, and comparative analysis of the volume of civil suits from six regions in Mexico, Peru and Spain. Ordinary litigants in the colonies--far more often than peninsular Spaniards--sued superiors at an accelerating pace in the second half of the eighteenth century. Three types of cases increased even faster than a stunning general rise of civil suits in the colonies: those that slaves, native peasants and women initiated against masters, native leaders and husbands. As they entered court, these litigants advanced a new law-centered culture distinct from the casuistic, justice-oriented legal culture of the early modern period. And they did so at precisely the same time that a few bright minds of Europe enshrined new ideas in print. The conclusion considers why, if this is so, the Spanish empire has remained marginal to the
story of the advent of the modern West.

Acts of the Philippine Commission, No. 1-1800

The Enlightenment on Trial

The book reports on advanced topics in the areas of neurorehabilitation research and practice. It focuses on new methods for interfacing the human nervous system with electronic and mechatronic systems to restore or compensate impaired neural functions. Importantly, the book merges different perspectives, such as the clinical, neurophysiological, and bioengineering ones, to promote, feed and encourage collaborations between clinicians, neuroscientists and engineers. Based on the 2016 International Conference on Neurorehabilitation (ICNR 2016) held on October 18-21, 2016, in Segovia, Spain, this book covers various aspects of neurorehabilitation research and practice, including new insights into biomechanics, brain physiology, neuroplasticity, and brain damages and diseases, as well as innovative methods and technologies for studying and/or recovering brain function, from data mining to interface technologies and neuroprosthetics. In this way, it offers a concise, yet comprehensive reference guide to neurosurgeons, rehabilitation physicians, neurologists, and bioengineers. Moreover, by highlighting current challenges in understanding brain diseases as well as in the available technologies and their implementation, the book is also expected to foster new collaborations between the different groups, thus stimulating new ideas and research directions.

Serial set (no.4501-5000)

Using the city of Puebla de los Ángeles, the second-largest urban center in colonial Mexico (viceroyalty of New Spain), Pablo Miguel Sierra Silva investigates Spaniards' imposition of slavery on Africans, Asians, and their families. He analyzes the experiences of these slaves in four distinct urban settings: the marketplace, the convent, the textile mill, and the elite residence. In so doing, Urban Slavery in Colonial Mexico advances a new understanding of how, when, and why transatlantic and transpacific merchant networks converged in Central Mexico during the seventeenth century. As a social and cultural history, it also addresses how enslaved people formed social networks to contest their bondage. Sierra Silva challenges readers to understand the everyday nature of urban slavery and engages the rich Spanish and indigenous history of the Puebla region while intertwining it with African diaspora studies.

Public Laws Passed by the Philippine Commission

Rituals and Sisterhoods reveals the previously under-studied world of plebeian single women and single-female-headed households in colonial Mexican urban centers. Focusing on the lower echelons of society, Amos Megged considers why some commoner women remained single and established their own female-headed households, examining their unique discourses and self-representations from various angles. Megged analyzes these women's life stories recorded during the Spanish Inquisition, as well as wills and bequests, petitions, parish records, and private letters that describe—in their own words—how they exercised agency in male-dominated and religious spaces. Translations of select documents and accompanying analysis illustrate the conditions in which women dissolved their marriages, remained in long-lasting extramarital cohabitations, and
formed female-led households and “sisterhoods” of their own. Megged provides evidence that single women in colonial Mexico played a far more active and central role in economic systems, social organizations, cults, and political activism than has been previously thought, creating spaces for themselves in which they could initiate and maintain autonomy and values distinct from those of elite society. The institutionalization of female-headed households in mid-colonial Mexico had wide-ranging repercussions and effects on general societal values. Rituals and Sisterhoods details the particular relevance of these changes to the history of emotions, sexuality, gender concepts, perceptions of marriage, life choices, and views of honor and shame in colonial society. This book will be of significant interest to students and scholars of colonial Latin American history, the history of Early Modern Spain and Europe, and gender and women’s studies.

Management Accounting in Health Care Organizations

Annual Reports of the Secretary of War

Management Accounting in Health Care Organizations offers an introduction to the subject of management accounting and provides a user-oriented approach to the concepts and techniques students need in order to understand management accounting in a health care context. This volume includes the information needed to master the basics of full-cost accounting, differential cost accounting, and responsibility accounting. It describes the uses and limitations of management accounting and the common accounting pitfalls managers face when making routine health care management decisions. This important text is formatted to provide an interactive learning approach. Students prepare answers to problems as they appear throughout each chapter and analyze one or more practice cases at the end of the chapter. Each chapter's practice case is followed by several cases that can be assigned for analysis and discussion in the classroom setting.
